Alkasept Ultra

Universal cleaner

A scientifically developed low foaming decontaminant

Alkasept Ultra is a detergent pre-disinfection agent specifically formulated to aid in the reprocessing through 'manual scrubbing' of all immersable, reusable Surgical, Medical, Dental instruments prior to sterilisation.

Alkasept Ultra is also suitable for use in Ultrasonic Baths.

Use by soaking or ultrasonic tank.

Free of chlorine, aldehydes and phenols.

Use in all water hardnesses.

Direction for use

Before use, check the expiration date on the bottle. Store container tightly closed, upright and protect from frost, in it's original packaging and labelling. Do not mix with other products. Recommended for use in ultrasonic baths.

Prepare the solution at 2% : Press the sides of the bottle to obtain a 20ml dose in the dosing chamber. Pour a dose of 20ml for each litre of tap water at room temperature.

Use: 1. Totally immerse opened or dismantled instruments and medical devices, performing adequate irrigation of parts. 2. Brush until visual cleanliness or a minimum of 5 minutes in the ultrasonic bath. 3. Rinse thoroughlly with tap water. 4. Renew the preperation when soiled and at least once per day.

Then proceed to the next steps of disinfection and/or sterilisation of medical devices before reuse.

Packaging

1L dosing bottle, giving you a full 50 litres users strength solution from each bottle.
